## Inlines - Borders, padding, and background

This text tests borders and background on `fo:inline` element, including conditional borders/padding.

The following text should have a silver background, with no padding and no borders: This is regular text, this is raised by 6 pt above the baseline, this is lowered by 6 pt below the baseline, and this uses a larger font. The following text should have a thin solid border around it, padded by 1 pt from top and bottom and by 3 pt from left and right, borders and padding retained on line breaks: This is regular text, this is raised by 6 pt above the baseline, this is lowered by 6 pt below the baseline, and this uses a larger font. The following text should have a yellow background and a ridge red border, padded by 3 pt from top and bottom and by 6 pt from right and left, borders and padding discarded at line breaks: This is regular text, this is raised by 6 pt above the baseline, this is lowered by 6 pt below the baseline, and this uses a larger font. The following text should have a background made of colored spots (produced by tiled images), thin solid gray border, padded by 6 pt, padding discarded at line breaks: This is regular text, this is raised by 6 pt above the baseline, this is lowered by 6 pt below the baseline, and this uses a larger font.
